

International Conference on Probabilistic Methods Applied to Power Systems (PMAPS) 12-15 June 2022, Manchester, UK

Opportunities for Sponsorship

The 17th International Conference on Probabilistic Methods Applied to Power Systems (PMAPS) is supported by the IEEE Power & Energy Society (PES) and hosted by the Department of Electrical and Electronic Engineering at the University of Manchester. It will take place between 12-15 June 2022. The conference, is organised every two years since 1986 and typically attracts between 200 and 300 people. It covers all areas of power system planning, analysis, operation and control with particular focus on application of probabilistic and AI methods to deal with associated uncertainties associated with planning, reliability and forecasting.

We have developed various sponsorship packages, described in the attached document that might help your company to actively be involved with the conference by becoming one of the sponsors.

For more details please contact Mrs Chris Wall: Chris.Wall@manchester.ac.uk
